BO - HUB

B-INN-000

Epitech subject kit

Create your own pdf!

INTRODUCTION

You ever wanted to create your own pdf ?

To begin, you need to create a file named `subject.md`.

If you wan't to know how to create the previous page, just take a look at the `subject.md` file.

You want a logo on your first page ?
Just use a file named `logo.jpg` and put it in the same directory as your subject.md file.

PUT SOME COOL STUFF

Wanna some code ?

C ?

```c
int main() {
  return 0;
}
```

Cpp ?

```cpp
class A {
  public:
    A();
    ~A();
};
```

Maybe you want a terminal ?

```
▽                          Terminal                          –  +  x
~/B-INN-000> echo "Hello world" && ls
Hello world
generate_pdf.sh logo.jpg subject.md subject.pdf
```

An image ??

A BIG TEXT ???

$e = m6^2$

$e = m6_2$

A super link

    A good tabulation

<div align="center">A centered text</div>

LET'S GO FOR A NEW PAGE

ATTENTION

Love this tuto ?
